REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The present invention discloses process for utilizing regenerated polyester resin in presence of polyhydric alcohol and polybasic acid in order to produce new polyester with acid value not higher than 120 mg KOH/g, hydroxyl value not higher than 120 mg KOH/g and average number molecular weight of 2,000-30,000.

The prior art of record discloses for obtaining polyester that satisfies the above properties, however the process by which such polyester is obtained is different. In the process of the prior art the waste PET is depolymerized and the polybasic acid and polyhydric alcohol are added to the depolymerized PET. Therefore the PET of the prior art of record is not regenerated.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
